

SPARTAN® HANDFILM

- Stiff handfilm protects unitized goods from shifting and moving during transport
- Consistent film performance
- Good puncture resistance
- Proven dependability, even with the most aggressive loads
- 39 Gauge to 110 Gauge
- Designed for 100% recyclability

Part Number	Gauge	Micron	Width (cm)	Length (ft)	Rolls/Cases Per Skid	Roll/Case Weight (lbs)

www.paragonfilms.com

Paragon Films is committed to minimizing packaging waste. We reuse or recycle most pallets and excess plastic material generated by our manufacturing process. This is often referred to as PIR (post-industrial recycled) material. Paragon Films promotes sustainability by investing in technologies to produce superior thin gauge films which reduce waste and overall carbon footprint. Paragon Films uses a mix of polypropylene and polyethylene resins in its stretch film. Please check with your local recycling center to determine its ability to recycle our film. Post-consumer stretch film is extremely sought after to be recycled into a variety of products including bags, shrink films, sheet and lumber applications.
