

## HOW TO MEASURE FOR CORRECT CAN LINER SIZE

The size or gallon capacity of your trash receptacle is usually printed on the container itself. If not, here are simple instructions for measuring for the correct size. Remember, you should have about 3" to 4" of overhang on the outside of the receptacle.

**Bag Width:** Use 1/2 of the outer circumference of the receptacle.

**Bag Length:** Use the height of the receptacle, plus 1/2 of the container bottom, plus 3 inches (for overhang). For square or rectangular receptacles, use the diagonal of the receptacle bottom rather than the diameter.
